# Міністерство освіти і науки України Національний технічний університет України «Київський політехнічний інститут імені Ігоря Сікорського" Факультет інформатики та обчислювальної техніки

Кафедра інформатики та програмної інженерії

Звіт

з лабораторної роботи № 1 з дисципліни «Основи програмування»

«Бінарні файли»

Варіант 9

Виконав студент <u>ПП-15, Дзюбенко Даниїл Дмитрович</u> (шифр, прізвище, ім'я, по батькові)

Вєчерковська Анастасія Сергіївна

( прізвище, ім'я, по батькові)

Перевірив

# Лабораторна робота 1

### Бінарні файли

Мета – вивчити особливості створення і обробки бінарних файлів даних.

# Варіант 9

### Задача

Створити файл із списком клієнтів перукарні на день: прізвище та ім'я клієнта, час (у форматі ГГ:ХХ) та передбачувана тривалість процедури. При створенні файлу перевіряти, чи не зайнятий час і чи достатньо у майстра вільного часу для виконання необхідної процедури. Вивести список усіх клієнтів, які прийдуть після 16:30.
